

Historical Options:

- **yfinance** does not have proper historical data. It's just a forward looking options chain. You can look into the history of each options symbol. This requires knowing the contract symbol

The screenshot shows a GitHub discussion post by user **ericpien** on Oct 8, 2024. The post asks if there is anything needed that is not available via yfinance. Below the text is a code block with the following Python code:

```
import yfinance as yf
op = yf.Ticker('NVDA241011C00050000')
op.history()
```

Below the code is a table with 8 columns: Date, Open, High, Low, Close, Volume, Dividends, and Stock Splits. The table contains 10 rows of data for NVDA options from September 9, 2024, to October 7, 2024.

	Open	High	Low	Close	Volume	Dividends	Stock Splits
Date							
2024-09-09 00:00:00-04:00	54.150002	57.099998	54.150002	57.099998	2	0.0	0.0
2024-09-11 00:00:00-04:00	65.599998	65.599998	65.599998	65.599998	2	0.0	0.0
2024-09-12 00:00:00-04:00	69.300003	69.300003	69.300003	69.300003	2	0.0	0.0
2024-09-16 00:00:00-04:00	66.470001	66.470001	66.470001	66.470001	1	0.0	0.0
2024-09-18 00:00:00-04:00	65.449997	65.449997	63.889999	63.889999	47	0.0	0.0
2024-09-24 00:00:00-04:00	66.550003	66.550003	65.660004	65.660004	2	0.0	0.0
2024-09-30 00:00:00-04:00	68.949997	68.949997	68.949997	68.949997	1	0.0	0.0
2024-10-04 00:00:00-04:00	74.529999	74.930000	73.000000	74.930000	43	0.0	0.0
2024-10-07 00:00:00-04:00	75.000000	79.099998	75.000000	79.099998	6	0.0	0.0

1: [<https://github.com/ranaroussi/yfinance/discussions/2078>]

- Not intraday
- **post-no-preference's dolthub repo is a full dump going back to 2019 for 2,240 US stocks.**
 - https://www.dolthub.com/repositories/post-no-preference/options/data/master/option_chain
 - Does not contain ASTS, RKL B :(
 - Is not Intraday
 - It contains trade bid, asks, vols, and greeks for US equity options.
 - Data consistency does not seem good. Varying levels of frequency.
 - More recent data is recorded each weekday. Some older data was just recorded Monday, Wednesday, and Friday. The oldest data was just recorded once weekly.
- **Alpaca**
 - Historical up to 2024
 - Not intraday

- All rows seem unique i.e each contract has only 1 entry, therefore can't trace back history of a particular call to see if we would've made a profit
 - wtf is up with that
- Free tier uses indicative
 - |Indicative Pricing Feed is a free derivative of the original OPRA feed: the quotes are not actual OPRA quotes, they're just indicative derivatives. The trades are also derivatives and they're delayed by 15 minutes.|
 - So basically fake data
